

Growing Solutions Ltd

GS Bio Carb

Product

GS Bio Carb is designed for application to grass, lawns and turf.

GS Bio Carb is a natural carbohydrate compound derived from cane sugar.

GS Bio Carb contains specially blended carbohydrates, molasses, humic and fulvic acids, seaweed extract and essential trace elements that trigger the necessary functions in the plant and soil.

GS Bio Carb boosts the microbial numbers and reduces the need for salt based fertilisers.

Treatments

- GS Bio Carb Is excellent in rejuvenating poor growth and colour in Spring, particularly if tank mixed with GS Consolidate Plus.
- GS Bio Carb will improve vigour, colour, health and vitality in swards, the density is increased, but not at the detriment of leaf elongation.
- GS Bio Carb contains added bio stimulants, which in turn eliminates the need for extra seaweed applications.

Application Rates & Timing

Dilute 10-20litres of GS Bio Carb in 400–600litres of water per hectare.

For best results apply when turf is actively growing. During hot weather spray early morning or evening, mid-day sprays may not be as effective because of excessive moisture evaporation. Apply once a month all year round. It can be applied in all weather conditions except when there is frost or snow on the ground.

GS Bio Carb is compatible with all Growing Solutions products and can be tank mixed together.

10 Key Benefits

- Suppression of nematodes.
- Harder wearing turf.
- Reduces the need for salt fertilisers.
- Greener for longer turf.
- Reduces stress from heat, cold, drought.
- Healthier turf means less fungicide.
- Denser sward.
- Boosts uptake of nutrients.
- Stimulates deeper and more productive roots.
- Best results achieved with GS Consolidate Plus.

Storage

GS Bio Carb should be stored out of direct sunlight and in a cool place, but not in frost.
