

Growing Solutions Ltd

GS Consolidate Plus

Product

GS Consolidate Plus is designed for application to grass, lawns and turf. It supplies a unique combination of the nutrients that contribute to a greener, stronger turf.

GS Consolidate Plus supplies stabilized amine nitrogen in a form that is highly available via both the foliage and the roots. The calcium in GS Consolidate Plus is important for the development of strong cells in the plant and for loosening tight, compacted soils. Aeration and water penetration are improved and salt accumulation lessened. Magnesium and iron are constituents of chlorophyll, which is produced by the grass to give its green colour. Both of these elements are formulated in GS Consolidate Plus in highly available complexed forms for rapid assimilation via the foliage and that remain available in the soil for take up by the roots.

GS Consolidate Plus helps to regulate growth.

Treatments

- GS Consolidate Plus is an excellent starter fertiliser.
- GS Consolidate Plus can be applied throughout the year providing there is no snow or frost forecast.

Application Rates & Timing

Dilute 50 to 120litres of GS Consolidate Plus in sufficient water to obtain good even coverage per hectare.

For best results apply when turf is actively growing. During hot weather spray early morning or evening, mid-day sprays may not be as effective because of excessive moisture evaporation. Apply once a month all year round. It can be applied in all weather conditions except when there is frost or snow on the ground.

GS Consolidate Plus is compatible with all Growing Solutions products and can be tank mixed together.

10 Key Benefits

- Very quick and effective results.
- Healthy green colour all year round.
- Promotes more tillering and thickens sward.
- Quicker recovery from wear and tear.
- Greater drought resistance.
- Increased disease resistance.
- Increased root growth.
- Does not scorch
- Does not encourage excessive growth.
- Will help the draining effect of artificial lights.

Storage

GS Consolidate Plus should be stored out of direct sunlight and in a cool place, but not in frost.
