

Growing Solutions Ltd

GS Foli K

Product

GS Foli K is designed for application to grass, lawns and turf.

GS Foli K supplies additional Potassium nutrition when soil reserves and the turfs root system are unable to provide sufficient Potassium for reproductive growth.

GS Foli K is formulated to increase the foliar uptake of Potassium. It is a very efficient liquid foliar feed that is immediately available to the roots as well.

Treatments

- GS Foli K is ideally used in a programme associated with the GS Consolidate Plus nutrition.
- GS Foli K is not only associated with sports and amenity turf, but all plant life.
- GS Foli K, when mixed with GS Consolidate Plus, has every macro and micro nutrient the plant will ever need to sustain healthy, strong growth.

Application Rates & Timing

Dilute 20-50litres of GS Foli K in a minimum 400-500litres of water per hectare.

For best results apply when turf is actively growing. During hot weather spray early morning or evening, mid-day sprays may not be as effective because of excessive moisture evaporation. Apply once a month all year round. It can be applied in all weather conditions except when there is frost or snow on the ground.

Avoid use with fertilizers containing phosphate and sulphur as precipitation may occur.

GS Foli K is compatible with all Growing Solutions products and can be tank mixed together.

10 Key Benefits

- Plant resistance to wear and tear.
- Plant greater resistance to disease.
- More tolerance to drought.
- More tolerance to salinity.
- Strengthens plant cells for strong leaf blades.
- Improves colour and appearance
- Greatly assists in Nitrogen efficiency.
- Increases shoot and plant development.
- Help to reduce water loss from cells.
- Makes more fibrous roots, particularly in sand structures.

Storage

GS Foli K should be stored out of direct sunlight and in a cool place, but not in frost.
