

Growing Solutions Ltd

GS Foli Phos

Product

GS Foli Phos is designed for application to grass, lawns and turf. GS Foli Phos is a fluid nutrient compound designed to prevent nutrient deficiencies in the plant.

GS Foli Phos is a valuable supplement to soil applied nutrients and is particularly beneficial under conditions where soil nutrients are not readily available.

Treatments

- GS Foli Phos encourages earlier development of the young plant to develop good, strong rooting.
- GS Foli Phos can correct deficiencies in the plant, often shown by reduced growth, rooting, poor colour and narrow leaves.
- GS Foli Phos has good mobility in soil, thus reducing the stimulation of thatch.
- GS Foli Phos is excellent on sand structures to aid establishment and development.

Application Rates & Timing

Dilute 5-10litres of GS Foli Phos in a minimum 300-500litres of water per hectare.

For best results apply when turf is actively growing. During hot weather spray early morning or evening, mid-day sprays may not be as effective because of excessive moisture evaporation. Apply once a month all year round. It can be applied in all weather conditions except when there is frost or snow on the ground.

GS Foli Phos is compatible with all Growing Solutions products and can be tank mixed together.

10 Key Benefits

- Transports energy within the plant.
- Stimulates cell division.
- Provides young plants with necessary nutrition.
- Improves cold tolerance and wear and tear factors.
- Assists in respiration.
- Increase root development.
- Establishes quicker sward development.
- Improves greater rooting potential.
- Sward becomes more tolerant in winter conditions.
- Healthier colour and vigour all year round.

Storage

GS Foli Phos should be stored out of direct sunlight and in a cool place, but not in frost.
