## GS Iron 6% Plus

### Product

GS Iron 6% Plus is designed for application to grass, lawns and turf.

GS Iron 6% Plus is totally chelated for maximum efficiency. It is recommended that the product is used to green-up and harden the turf and help against fungal diseases. It contains no sulphates which may contribute to black layer in anaerobic conditions.

GS Iron 6% Plus is an ideal low cost tonic for turf that can help prevent moss formation, Fusarium and other diseases at the early stages, in order to reduce the turfs dependence on moss killers and other expensive fungicides.

It will give a rapid green-up effect lasting usually between 4-6 weeks depending on conditions.

### Treatments

- GS Iron 6% Plus will improve appearance in grasses and assist in reducing disease attacks.
- GS Iron 6% Plus will not induce unwanted growth, but will aid plant development, health and well being.

### Application Rates & Timing

Dilute 10-20litres of GS Iron 6% Plus in 400-500litres of water per hectare.

For best results apply when turf is actively growing. During hot weather spray early morning or evening, mid-day sprays may not be as effective because of excessive moisture evaporation. Apply once a month all year round. It can be applied in all weather conditions except when there is frost or snow on the ground.

GS Iron 6% Plus is compatible with all Growing Solutions products and can be tank mixed together.

## 10 Key Benefits

- Rapidly improves colour.
- Improves disease resistance.
